EXPERIENCE

Dec 2021- Present	iTwine Technologies , Bangalore. Software Engineer.
-------------------	---

EDUCATION

2022- 2024	Jain (Deemed-to-be University) , Bangalore. Master of Computer application (Full stack Development).
------------	--

TECHNICAL SKILLS

Programming Language	C# and VB .Net.
Frameworks	ASP.Net Web Forms, ASP.Net MVC, ASP.Net Web API and Entity Framework.
Web Development	HTML, CSS, Bootstrap, JavaScript, Ajax, jQuery and DevExpress Framework.
Report Designing	RDLC and DevExpress XtraReports.
Database Management	Microsoft SQL Server.
ETL operation	SQL Server Integration Services.
Version Control	Git.
Architecture	N-tier Layered Architecture.
Development Tools	Visual Studio 2019, Visual Studio 2022, SQL Server Management Studio.

PROJECT DETAILS

Project Name	Stables (New York Racing Association Finance System)
Work Location	iTwine Technologies, Bangalore.
Technologies	VB.Net, ASP.Net MVC, DevExpress Controls, Bootstrap 4.0, JavaScript, Ajax, SQL Server, SQL Server Integration Services.
Description	Stables is the web based financial application used for end of day data entry of sales and Pari-mutual gaming operations. It tracks all the transactions, then those data are reconciled by applying variety of business rules to generate the reports. It handles the contracts for simulcasting the race and generates the settlements reports.
Role	Requirement analysis, design and development. Designing database schema, creating stored procedures. UI design using DevExpress framework and Report design using DevExpress XtraReport. Developing the SSIS packages and scheduling them to load and validate transactional data from various tote database to the finance system database.
Project Name	AmTote Elite Reporting
Work Location	iTwine Technologies, Bangalore.
Technologies	C#, ASP.Net Web Forms, Bootstrap, JavaScript, SQL Server, Azure DevOps, RDLC reports.
Description	AmTote Elite is a reporting web application and handles wagering rebate rate entry for the bettor belonging to elite community. The reports give complete insight on the wagering of a racing event occurring in different communities across the country, source and pool.
Role	Requirement analysis, design and development. Designing RDLC reports, defining datasets and binding them to custom report formats. And automating those reports to send it via mails to the respective stake holders.
Project Name	ITCS (IRS Ticket Cashing System)
Work Location	iTwine Technologies, Bangalore.
Technologies	VB.Net, ASP.Net Web Forms, DevExpress Controls, Bootstrap 4.0, JavaScript, SQL Server.
Description	ITCS is a web application which records the taxable transaction of the NYRA wagers. It is also used to capture the bettors live picture and document verification through live video streaming cameras.
Role	Requirement analysis and implementing. Designing database, creating stored procedures.
Project Name	Ostler
Work Location	iTwine Technologies, Bangalore.
Technologies	VB.Net, ASP.Net web API, DevExpress Controls, Bootstrap 4.0, JavaScript, SQL Server.
Description	Olster is a web-based application which is used to create multiple tenant instances of the existing Stables application for the respective organizations.
Role	Requirement analysis, design and development. Creating multiple database instances using scripts through console application.
Project Name	KSIC (Mysore Silks)
Work Location	iTwine Technologies, Bangalore.
Technologies	VB.Net, ASP.Net Web Forms, Silverlight, JavaScript, SQL Server.
Description	It is the sales management web application used for product configuration, invoice activity and inventory maintenance.
Role	Maintenance and implementing required changes.
